

Domestic Electric Reel Systems

for Bubble and Foam Covers

Prism Reel

(ideal retro-fit for outdoor pools)

The Prism Reel is a 12v DC battery operated reel system. The battery is charged by a daylight sensitive solar cell which is mounted on the top of one of the end stands. The telescopic anodised winding tube is adjustable. Available in two sizes to suit pool widths of 12ft – 15ft and 16ft – 20ft and is able to handle bubble covers up to 20' x 40' (6m x 12m) pools with a 5ft (1.2m) roman end. The reel is ideal to retro-fit to existing outdoor pools as it requires no mains electrical power supply or wiring. The prism is available with key switch or remote control operation. Includes emergency charger and battery tester.

Prism Reel with remote control

Electrolyte Reel

(ideal retro-fit for indoor pools)

The Electrolyte reel is also a battery operated reel system, it also requires no mains electrical power supply making it the ideal retro-fit for indoor pools. The batteries are housed in one of the end stands and are recharged by use of a transfer charge pack which is kept on charge in the pool plant room. The anodised telescopic tube is adjustable. Available in two sizes to suit pool widths of 12ft – 15ft and 16ft – 20ft and is able to handle bubble covers up to 20' x 40' (6m x 12m) pools with a 5ft (1.2m) roman end. The Electrolyte is available with key or remote control.

Electrolyte Reel

Kryptonite Reel

The Kryptonite electric reel is fitted with either a 12v DC or 24v DC motor and powered from a 230v control box which can either be housed in the plant room or an adjacent wall (see latest IEE Regulations). The 6" anodised rolling tube is factory cut to suit the width of the pool and the end stands are fabricated from powder coated stainless steel. Available in sizes up to 24' wide and can handle 500Mu bubble covers up to 24' x 48' + 5' roman end and foam cover up to 800sqft (75m²). The Kryptonite is available with key or remote control.
